

## **Help Maua Hospital Respond to Food Crisis in Kenya**

Drought in Eastern Kenya has brought famine to the country, where a national crisis was declared in January. Jerri and Bill Savuto, GBGM missionaries, are currently serving at Maua Hospital and are seeking to address the great need there. More and more children sick and dying from malnutrition are being admitted to Maua Hospital's pediatric ward. In a recent newsletter, Jerri said: "We can help these children recover from their illnesses and even gain weight but then we have to send them home to the same situation. The hospital has started a program to send food home with families of children like this."

If you would like to make a contribution to help provide food for these children and their families, please send contributions through the conference office designated to "**Advance Special #09613A** – Maua Hospital Service Fund, Kenya" with the notation for "Feed the Hungry."
